

# **NAME HERE**

**Software Engineer**

Chicago, IL

**P:** 773-551-5293 | **E:** zachbryce12@gmail.com

**G:** github.com/zbryce | **L:** <https://www.linkedin.com/in/zach-bryce-ba87611b0/>

## ***Technologies***

Node; Javascript; React/Redux; Git; Babel; Express; HTML5; CSS3; PostgreSQL; Sequelize; Express-fileUpload; MongoDB

## ***Projects***

### **Victory Charts Project / High School Diploma**

July 2020 - Fullstack Academy

This project, appropriately deemed the 'async week project', allowed me and my classmates to focus on things that were primarily outside the core curriculum. I used this time to work with the victory charts api. I learned valuable front end data presentation skills, like working with intricate charts requiring creative learning. I presented this to the cohort, demonstrating what I learned.

### **Grace Shopper (E-commerce site)**

August 2020

For this project I worked in a team of four, creating an e-commerce site that sold bakery goods. I learned to work in a quick paced team environment, collaborate my coding knowledge with others, and implement a fully functional fullstack application.

### **Stackathon (Socket I.O Real Time Chat Application)**

August 2020

In this project I ventured into a new form of browser to server connectivity, with web sockets. Using Socket I.O, I created a chat application that allowed for group, private, and authorized real time communication.

### **Capstone Project (Remote Learning Application)**

August-September 2020

The capstone project was the culmination of the skills and technologies I learned over the three month course. I worked in a team of four to create a remote learning application, connecting students and teachers with: assignments, real time chats, work submission, attendance, course enrollments, zoom classrooms, and much more.

## ***Employment***

### **MHub Internship**

November 2018 r-January 2019

I interned at mhub, a maker lab in the heart of Chicago for several months. They specialize in things ranging from electronic manufacturing, to intricate mural displays. I interned and assisted for Peet Hill.

## ***Education***

Fullstack Academy, Chicago, IL  
**Certificate**, Software Engineering  
**17-Week Full Stack Immersive**

09/20

Jones College Prep  
**High School Diploma**

06/19
